THE Test Data CHECKLIST

Check all boxes that apply to you

☐ **I've been told to use production data in testing.**
I know; not cool.

☐ **I'm in QA and don't know enough about the test data I've been given.**
Which btw isn't finding bugs.

☐ **I'm an engineer tasked with creating test data, and it's really hard.**
Someone help me!

☐ **I'm a team lead and our staging environment is broken.**
Creating useful test data ourselves just isn't sustainable.

☐ **My test data is unrealistic, ineffective, outdated, and/or at risk of leaking sensitive data into my lower environments.**
Ok, so we are having some issues with our test data. Don't tell anyone.

⚠ If you checked even one of the boxes **it's time to meet Tonic.ai**

Safe, Realistic, De-identified data

It's the safest, fakest data around for QA, testing, and analysis.
